PROFESSIONAL SUMMARY

I am a passionate Python Backend Developer with practical experience in Django and Django REST Framework. I have developed e-commerce and REST API projects that include user authentication, payment integration, and admin management features. I enjoy building structured backend systems and writing clean, efficient, and maintainable code. I am eager to learn and grow in a professional development environment.

PROJECTS

1. E-Commerce Web Application (E-Shop)

Type: Academic / Training Project

- Developed a full-featured e-commerce web application using Django. Implemented user authentication. Built product listing, category filtering, and product detail pages. Developed cart system, order management, and order history functionality. Integrated Razorpay payment gateway for secure online transactions. Added user profile management, address management. Implemented admin panel for managing users, products, and orders. Used AJAX for dynamic image uploads.

- Technologies Used: Python, Django, HTML, CSS, JavaScript, Bootstrap, SQLite
- GitHub link: <https://github.com/tisha1104/python/tree/main/eshop>

2. E-commerce Backend REST API (E-Shop Rest)

Type: Academic / Training Project

- Designed and developed RESTful APIs using Django REST Framework. Implemented token-based authentication. Created APIs for Product management, category management, cart, and orders. Integrated Razorpay payment functionality within API workflow.

- Technologies Used: Python, Django, Django REST Framework, SQLite, REST API
- GitHub link: <https://github.com/tisha1104/python/tree/main/eshoprest>

EDUCATION

Python Backend Development

Top's Technologies

Feb – 2026

Bachelor of Commerce (B. Com)

Veer Narmad South Gujarat University, Surat

June 2022 - May 2025

TECHNICAL SKILLS

Backend & APIs: Python, Django, REST API, JWT Auth

Frontend: HTML, CSS, Bootstrap

Database & Tools: MySQL Workbench, Postman, GitHub

AI & Tooling: Google Gemini, ChatGPT, Cloud ai, GitHub Copilot

AI Tools & Development Workflow

Google Gemini - Research, documentation, and concept clarification

ChatGPT - Code generation, debugging, backend logic understanding

Claude AI - Codebase analysis, root-cause debugging, and clean code generation

GitHub Copilot - Code suggestions and developer productivity
